# Financial Strategies for <br> Successful Retirement 

This material is intended to provide general information and is not intended to provide tax or legal advice. This material is not intended to be used to avoid tax penalties. It was prepared to support the promotion or marketing of the matter addressed in this document. Because individual situations vary, it is recommended that decisions be made after consultation with competent financial, tax, and legal advisors. Seminar instructors are not agents or employees of Broadridge Investor Communication Solutions, Inc. (Broadridge) or Voya Services Company. Instructors may be licensed to provide products through insurance companies and registered to provide financial services through registered investment advisory firms and securities through broker/dealer firms.

Broadridge and/or Voya Services Company prohibit instructors from engaging in any product endorsement or selling during the seminar. When the seminar is over, instructors may offer financial advice, products, or other services as affiliates of registered investment advisory firms, registered representatives of broker/dealer firms, and agents for insurance companies. These services are not offered on behalf of Broadridge and/or Voya Services Company. Broadridge and/or Voya Services Company do not sell or endorse any insurance or investment products and do not allow instructors to use their names to solicit insurance, securities, or other financial services or products at any time.

## Everyone Needs Retirement Planning

Most people spend time dreaming about having the financial freedom to do what they want.

Unfortunately, most people do not spend enough time preparing for the financial realities of retirement.

Many Americans have discovered that it is possible to increase their retirement savings without seriously reducing their standard of living.

This course will give you knowledge that you need.
Once your finances are in place, you may consider various leisure activities.

## My Objectives

Please take a few moments to list your reasons for attending this class. Identifying what you want to receive from this experience will help you focus on the information that is most helpful to you.

## How This Course Can Help You

## This course will help you learn how to:

- Assess your retirement income needs.
- Understand a variety of investment choices.
- Potentially increase your investment returns.
- Use federal tax laws to your advantage
- Make wise use of your employer-provided benefits.
- Protect yourself and your family from economic catastrophes.
- Transfer your possessions to the next generation.
- Develop a plan to meet your retirement goals.

## Financial Basics

"Money is only a tool. It will take you wherever you wish,

## but it will not replace

you as the driver."

Ayn Rand

3. $\qquad$
4. 
5. $\qquad$
6. $\qquad$

## Does a Convenient Time Ever Come?

We're 25. We can't save money now. We're just getting started and don't earn very much. It takes everything we have to pay the bills and have some fun. Besides, we don't plan to retire for another 30 or 40 years. We have lots of time.

## We're 35. Our family is growing. Our mortgage and car

 payments are very high. We need to invest in ourselves so we can get promoted. When we have higher-paying jobs, we will have money to invest. But we can't afford anything now.
## Does a Convenient Time Ever Come?

We're 45. We spend all of our extra money on our children. We work hard and think we deserve a good lifestyle. We should be able to save after the children are on their own.

We're 55. Retirement is staring us in the face. We need to get started on our investments. But our careers have peaked. We need all of our income to live. Our parents are facing healthcare issues that we may need to finance, and our children still need some help. We can't afford to set anything aside right now.

We're 65. Who, us? Sure, investing is a great idea, but we're 65 . Social Security doesn't go far. We should have started years ago, but it's too late now.

## Nine Reasons People Fail Financially in Retirement

1. Procrastination.
2. Failure to set clear financial goals.

3. 
4. $\qquad$
5. $\qquad$

## Setting Goals

These are the steps in goal setting:

1. Dream.
2. Reduce the dreams to writing.

Make them specific.
Quantify them.
Set them within a time frame.
3. Organize the dreams.

Prioritize them.
Determine a course of action.
Break the goals into subgoals.

## Setting Goals

4. Implement your action plan.

Take action.
Monitor your progress.
Adjust as needed.
5. Celebrate your accomplishments!

## Nine Reasons People Fail Financially in Retirement

1. Procrastination.
2. Failure to set clear financial goals.
3. Failure to establish plans to meet their goals.
4. Unwise use of credit.
5. $\qquad$
6. $\qquad$
7. $\qquad$
8. $\qquad$
9. $\qquad$

## Using Credit Wisely

## Bad debt

## Using Credit Wisely

## Necessary debt

## Controlling Debt

- Start paying cash for your purchases.
- Use debit cards instead of credit cards.

Close all nonessential accounts.

- Pay as much as you can on each credit card account each month.
- When one account is paid off, divert the payment amount to other accounts or to savings.
- Except in rare situations, don't sell investments to pay debts.
- Seek credit counseling, if appropriate.

## Nine Reasons People Fail Financially in Retirement

1. Procrastination.
2. Failure to set clear financial goals.
3. Failure to establish plans to meet their goals.
4. Unwise use of credit.
5. Lack of understanding about what money can do for them.

## Making Compounding Work for You ${ }^{1}$

| Years | $\mathbf{4 \%}$ | $\mathbf{8 \%}$ | $\mathbf{1 0 \%}$ |
| :---: | :---: | :---: | :---: |
| $\square \mathbf{3 0}$ | $\$ \mathbf{3 3 1 , 3 5 0}$ | $\$ 1,093,573$ | $\underline{\$ 1,983,740}$ |
| $\square 20$ | $\$ 222,258$ | $\$ 492,680$ | $\$ 732,807$ |
| $\square \mathbf{1 0}$ | $\$ 149,083$ | $\$ 221,964$ | $\$ 270,704$ |

${ }^{1}$ The hypothetical investment results are for illustrative purposes only and should not be deemed a representation of past or future investment results. Actual investment results may be more or less than those shown. This does not represent any specific product. Monthly compounding from beginning of period is assumed.

## Consistent Investing ${ }^{1}$

Starting amount:
Monthly additions: \$100

| Years | Invested | $\mathbf{4 \%}$ | $\mathbf{8 \%}$ | $\mathbf{1 0 \%}$ |
| :---: | :---: | :---: | :---: | :---: |
| $\square \mathbf{3 0}$ | $\$ 36,000$ | $\mathbf{\$ 6} 9,636$ | $\$ 150,030$ | $\$ 227,933$ |
| $\square \mathbf{2 0}$ | $\$ 24,000$ | $\$ 36,800$ | $\$ 59,295$ | $\$ 76,570$ |
| $\square \mathbf{1 0}$ | $\mathbf{1 2 , 0 0 0}$ | $\mathbf{\$ 1 4 , 7 7 4}$ | $\mathbf{\$ 1 8 , 4 1 7}$ | $\mathbf{\$ 2 0 , 6 5 5}$ |

[^1]
## Double or Nothing: The Rule of 72

The Rule of 72 quickly estimates how long it will take for you to double your money. The formula is:
$\frac{72}{\text { Rate of return }}=$ Number of years to double value ${ }^{1}$ Examples: $\frac{72}{3}=24$ years to double the value

$$
\begin{aligned}
& \frac{72}{6}=12 \text { years to double the value } \\
& \frac{72}{9}=8 \text { years to double the value }
\end{aligned}
$$

[^2]
## Double or Nothing: The Rule of $\mathbf{7 2}^{\mathbf{1}}$

| Year |  | $\mathbf{3 \%}$ | $\mathbf{6 \%}$ |
| :---: | :---: | :---: | :---: |
| $\mathbf{0}$ | $\mathbf{6 1 0 , 0 0 0}$ | $\mathbf{\$ 1 0 , 0 0 0}$ | $\mathbf{9 \%}$ |
| 8 |  |  | $\$ 10,000$ |
| 12 |  | $\$ 20,000$ |  |
| $\mathbf{1 6}$ |  |  | $\$ 40,000$ |
| $\mathbf{2 4}$ | $\$ 20,000$ | $\$ 40,000$ | $\$ 80,000$ |

[^3]
## Procrastination - A Costly Mistake ${ }^{1}$

\$4,000 per year, 10 percent return

| Age | Bill | Tom | Age |  | Bill |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Tom |  |  |  |  |  |
| 45 | 0 | $\$ 4,000$ | 55 | $\$ 4,000$ | 0 |
| 46 | 0 | $\$ 4,000$ | 56 | $\$ 4,000$ | 0 |
| 47 | 0 | $\$ 4,000$ | 57 | $\$ 4,000$ | 0 |
| 48 | 0 | $\$ 4,000$ | 58 | $\$ 4,000$ | 0 |
| 49 | 0 | $\$ 4,000$ | 59 | $\$ 4,000$ | 0 |
| 50 | 0 | $\$ 4,000$ | 60 | $\$ 4,000$ | 0 |
| 51 | 0 | $\$ 4,000$ | 61 | $\$ 4,000$ | 0 |
| 52 | 0 | $\$ 4,000$ | 62 | $\$ 4,000$ | 0 |
| 53 | 0 | $\$ 4,000$ | 63 | $\$ 4,000$ | 0 |
| 54 | 0 | $\$ 4,000$ | 64 | $\$ 4,000$ | 0 |

1 The illustration does not consider tax implications or withdrawals. It assumes an annual contribution at the beginning of the year and a 10 percent rate of return compounded monthly from the beginning of the period. The hypothetical investment results are for illustrative purposes only and should not be deemed a representation of past or future investment results. Actual investment results may be more or less than those shown. This does not represent any specific product.

If Tom invested the full 20 years, he would have $\$ 267,042$.

## Stress and Retirement

The following life events are potential stressors.

## Life Event

- Retirement
- Business readjustment
- Change in financial state
- Change to different line of work
- Change in responsibilities at work

- Spouse begins or stops work
- Loss of spouse
- Change in living conditions
- Revision of personal habits
- Change in residence
- Change in recreation

## FEDERAL INCOME TAX TERMS

Gross income
Adjusted gross income (AGI)
Standard deduction
Itemized deductions
Exemption
Taxable income
Tax credits

## Your Investments and Taxes

These are the primary types of investment earnings:

- Interest
- Dividends
- Capital gains
- Capital gains distributions

## Your Investments and Taxes

| Type of income | Federal income tax treatment |
| :--- | :--- |
| Interest | Ordinary income |
| Qualified dividends | Taxed at a maximum <br> $20 \%$ rate $^{1,2}$ |

1 Qualified corporate dividends are taxed at the same rates as long-term capital gains: 20 percent for those in the 39.6 bracket and 15 percent for most other taxpayers, except those in the 10 and 15 percent federal brackets, who pay no dividend taxes.
2 As a result of the Patient Protection and Affordable Care Act, some higher-income individuals may be subject to an additional 3.8 percent Medicare unearned income tax on net investment income if their adjusted gross incomes exceed $\$ 200,000$ (single filers) or $\$ 250,000$ (married joint filers). Unearned income includes capital gains and dividends.

## Your Investments and Taxes

| Type of income | Federal income tax treatment |
| :--- | :--- |
| Capital gains |  |
| Asset held less than 12 months | Ordinary income |
| Asset held at least 12 months | Taxed at a maximum <br> $20 \%$ rate ${ }^{2,3}$ |
| Capital gains distributions | Same as capital gains, based <br> on how long the mutual fund <br> held the assets |
| Tax-deferred | Taxed as ordinary income <br> when withdrawn |

[^5]4 Additional penalties may apply.

## Current Year Tax Benefit Comparison

## Taxable earnings ${ }^{1}$

| Investment | $\mathbf{\$ 4 , 0 0 0}$ |
| :--- | ---: |
| Annual return | $\mathbf{3 \%}$ |
| Taxable earnings | $\mathbf{\$ 1 2 0}$ |
| Federal income tax bracket |  |
| Current income tax owed | $28 \%$ |

## Current Year Tax Benefit Comparison

## Tax-deferred earnings ${ }^{1}$

| Investment |  | $\mathbf{\$ 4 , 0 0 0}$ |
| :--- | :--- | ---: |
| Annual return |  |  |
| $\overline{3 \%}$ | $\mathbf{3 \%}$ |  |
| Deferred earnings |  |  |
| Federal income tax bracket |  | $\mathbf{1 2 0}$ |
| Current income tax deferred |  | $\$ 3 \%$ |

${ }^{1}$ The hypothetical investment results are for illustrative purposes only and should not be deemed a representation of past or future investment results. Actual investment results may be more or less than those shown. This does not represent any specific product.

## Current Year Tax Benefit Comparison

## Tax-deductible contributions ${ }^{1}$

| Investment | $\mathbf{\$ 4 , 0 0 0}$ |
| :--- | ---: |
| Tax-deductible contribution | $\mathbf{\$ 4 , 0 0 0}$ |
| Federal income tax bracket | $28 \%$ |
| Current income tax reduction | $-\mathbf{\$ 1 , 1 2 0}$ |

## Current Year Tax Benefit Comparison

## Tax-free income ${ }^{1}$

| Investment | $\mathbf{\$ 4 , 0 0 0}$ |
| :--- | ---: |
| Annual tax-free return | $\mathbf{3 \%}$ |
| Tax-free income | $\mathbf{\$ 1 2 0}$ |
| Federal income tax loracket |  |
| Income tax avoided | $\mathbf{2 8 \%}$ |

## Impact of Income Taxes and Inflation

| Beginning amount $^{\mathbf{1}}$ | $\mathbf{\$ 1 0 , 0 0 0}$ |
| :--- | :---: |
| Return | $\mathbf{3 . 0 \%}$ |
| Annual income |  |
| Income tax | $-\quad-300$ |
| Net after income tax | $-\$ 84$ |
| Inflation on investment and net | $\mathbf{\$ 2 1 6}$ |
| Net purchasing power | $-\$ 212$ |
| Real rate of return | $\mathbf{\$ 1 0 , 0 0 4}$ |

${ }^{1}$ This simplified illustration assumes investment is made at beginning of year. Return on annual income is compounded annually. Inflation on investment is calculated from beginning of year. Inflation on return is calculated annually. Calculations assume 28 percent income tax bracket and 20-year average rate of inflation of 2.12 percent. The hypothetical investment results are for illustrative purposes only and should not be deemed a representation of past or future investment results. Actual investment results may be more or less than those shown. This does not represent any specific product.
